Multiple Dyslexia tests have been engineered and tested to cover a broad age range and provide in depth screening, diagnosis and support development of therapy recommendations. For those requiring more depth to understand the dyslexic student, a text book on the subject is available.

The most extensive kit, called the DDT, is also available for testing Spanish students with an English speaking administrator. This DDT provides screening, diagnosis and recommended therapy.

The Pre-Dyslexia Letter Coding Test (PLCT) Kit includes a supply of Recording and Summary Forms. Use with students in the second half of Kindergarten.

The Dyslexia Screener for First Graders (DSF) Kit and The Dyslexia Screener for Grades 2-9 (TDS) Kits both include a supply of Decoding and Encoding forms. TDS also available for French speaking children.

The Dyslexia Determination Test Kit for Grades 2-12 (DDT) includes DDT Examiner’s Manual, Decoding book, Reference table for Decoding and Encoding results plus a supply of Decoding Pattern A and B Forms plus Interpretation Forms.

The Adult Dyslexia Test (ADT) includes a supply of Decoding and Encoding forms.

The items included in these kits are also available separately. Check our web site or call us for an accessory price list.

The Textbook ‘Therapy in Dyslexia and Reading’ covers vision, perception and motor skills for all ages and was written by Drs. John Griffin and Howard Walton. Topics include Sensory Aspects of Vision, Eye Movement Control, Visual Perception, Motoric Skills, Visualization, Hearing and Speaking, Dyslexia Therapies covering Dysnemkinesia, Dyseidesia, Dysphonesia, and Dysphon- eidesia. 111 pages.
